WESTERN RESOURCES FILES MERGER APPLICATION WITH PSC;
MERGER OFFERS BETTER DEAL FOR ALL

TOPEKA, Kansas, May 3, 1996 -- Western Resources today filed an
application with the Missouri Public Service Commission (PSC) seeking
approval to merge with Kansas City Power & Light (KCPL). The
application also requests the Missouri PSC reject the proposed merger
of UtiliCorp and KCPL.

"We are asking the Missouri PSC to approve the merger that we
believe would be the best for customers, shareholders, and employees
-- a Western Resources/KCPL combination. Our long-term business plan
is one based on customer driven benefits, as well as expansion and
growth, not retrenchment," said John E. Hayes, Jr., Western Resources
chairman of the board and chief executive officer. "Our merger
results in about \$400 million more in savings over 10 years than the
UtiliCorp transaction."

If a Western Resources merger is approved, customers would benefit from the combination, which would create an \$8.3 billion energy company with the financial strength to provide lower, stable rates and superior service. KCPL customers in Missouri would experience rate reductions 30% greater than the reductions under the UtiliCorp deal. Western Resources also pledged a five-year rate freeze after the merger is completed.

Western Resources' application details the financial terms of the merger offer, including higher dividends and a better share price to KCPL shareholders.

"Based on our experience with the 1992 merger of KPL and Kansas Gas and Electric (KGE)," said Hayes, "we're confident our savings projections are on target, the benefits to shareholders are real, and our offer is better than UtiliCorp's."

Hayes also said Western Resources commits to not laying off any Western Resources or KCPL employees as a result of the merger. "We're proud of the fact we achieved our savings targets in our previous merger without laying off any KPL or KGE employees. We are committed to doing the same in this merger."

On April 14, Western Resources proposed a merger with KCPL that would produce more than \$1 billion in cost savings. The merger would be a tax-free stock exchange transaction offering increased annual dividends and a premium over market price for KCPL shareholders, earnings improvement for Western Resources and KCPL shareholders, and lower rates for customers.

Western Resources (NYSE:WR) is a diversified energy company. Its utilities, KPL and KGE, operating in Kansas and Oklahoma, provide natural gas service to approximately 650,000 customers and electric service to approximately 600,000 customers. Through its subsidiaries, Westar Business Services, Westar Consumer Services, Westar Capital, and The Wing Group, energy-related products and services are developed and marketed in the continental U.S., and offshore.
