## **2008 EEI Presentation**

**November 11, 2008** 

Mike Chesser, Chairman and CEO

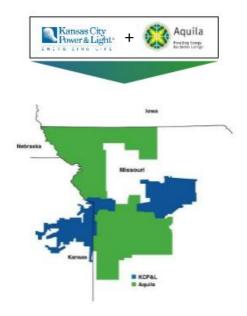

## Forward Looking Statement

Statements made in this presentation that are not based on historical facts are forward-looking, may involve risks and uncertainties, and are intended to be as of the date when made. Forward-looking statements include, but are not limited to, the outcome of regulatory proceedings, cost estimates of the Comprehensive Energy Plan and other matters affecting future operations. In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the registrants are providing a number of important factors that could cause actual results to differ materially from the provided forward-looking information. These important factors include: future economic conditions in the regional, national and international markets, including but not limited to regional and national wholesale electricity markets; market perception of the energy industry, Great Plains Energy, Kansas City Power & Light (KCP&L), and KCP&L Greater Missouri Operations Company (GMO); changes in business strategy, operations or development plans; effects of current or proposed state and federal legislative and regulatory actions or developments, including, but not limited to, deregulation, re-regulation and restructuring of the electric utility industry; decisions of regulators regarding rates KCP&L and GMO can charge for electricity; adverse changes in applicable laws, regulations, rules, principles or practices governing tax, accounting and environmental matters including, but not limited to, air and water quality; financial market conditions and performance including, but not limited to, changes in interest rates and credit spreads and in availability and cost of capital and the effects on pension plan assets and costs; credit ratings; inflation rates; effectiveness of risk management policies and procedures and the ability of counterparties to satisfy their contractual commitments; impact of terrorist acts; increased competition including, but not limited to, retail choice in the electric utility industry and the entry of new competitors; ability to carry out marketing and sales plans; weather conditions including weather-related damage; cost, availability, quality and deliverability of fuel; ability to achieve generation planning goals and the occurrence and duration of planned and unplanned generation outages; delays in the anticipated in-service dates and cost increases of additional generating capacity and environmental projects; nuclear operations; workforce risks, including retirement compensation and benefits costs; the ability to successfully integrate KCP&L and GMO operations and the timing and amount of resulting synergy savings; and other risks and uncertainties. Other risk factors are detailed from time to time in Great Plains Energy's and KCP&L's most recent quarterly reports on Form 10-Q or Annual Reports on Form 10-K filed with the Securities and Exchange Commission. This list of factors is not all-inclusive because it is not possible to predict all factors.

## Great Plains Energy - Positioned to "Weather the Storm"

- We will be challenged in 2009 by the same economic factors impacting others in the industry;
- We believe we have the liquidity to weather difficulties in global markets and continue to be committed to the dividend;
- We are managing those challenges by prudently reducing near-term capital expenditures while steadfastly living up to our commitments;
- We have a plan to move all areas toward a Tier 1 cost structure;
- We will continue to work diligently to effectively and constructively manage our regulatory relationships;
- We have an experienced, talented senior management team to lead the company through difficult times; and
- Our Path to Growth remains intact.

## A Path to Growth

#### 2009 and beyond: Extend the platform

- Integrate Aquila and deliver synergies
- Complete and include Iatan 1 AQCS and GMO environmental projects in rates effective in 2009
- Complete Iatan 2
- Evaluate 400 MW of additional wind
- Additional environmental spending at LaCygne 1 and potentially LaCygne 2 and Montrose
- Continue with sound strategic planning to effectively meet future generation requirements and be an industry leader in energy efficiency
- Expected dividend growth, with a traditional target payout ratio, to follow

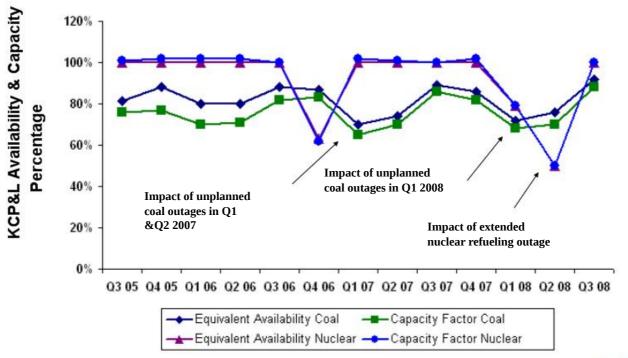

William Downey,
President and COO
Kansas City Power & Light

# **Operations Highlights**

- Integration progressing smoothly and synergy capture on target
- Customer satisfaction and reliability remains strong
- Progress on implementation of energy efficiency and demand response
- KCP&L coal units set monthly and quarterly records

# KCP&L Equivalent Availability / Capacity

• For the period July 14 - September 30, 2008, GMO had equivalent availability of 94% and a capacity factor of 76%

# Construction Update

- Iatan 1 AQCS
- Planned completion January 2009; in-service February 2009
- Iatan 2
  - Planned completion summer 2010
  - Planned cost re-assessment to be completed in early 2009
- Sibley 3 SCR
  - On schedule; planned completion and in-service Q4 2008
- LaCygne
  - Significant expenditures extended beyond 2010
- Wind
  - Continuing to assess opportunities

- Mild 3Q weather
- Purchased power \$19.9 million higher
- Dilution of \$0.16 caused by shares issued in connection with GMO transaction

Includes KCP&L for full nine months and GMO results for the period 7/14/08 - 9/30/08

# **Key Assumptions**

#### Great Plains Energy 2009 Guidance Range \$1.30 - \$1.60

#### • Revenue

- · Normal weather
- Retail (weather-normalized)
  - $\cdot$  2009 Retail MWh sales essentially flat compared to 2008 for KCP&L; growth rate at GMO ~1.5%, similar to 2008 growth
  - <u>·</u> 2010-11 Retail growth of 0.5% 1% at KCP&L and 1% 2% at GMO
- New wholesale margin threshold for KCP&L-MO of \$92.5 million (subject to true-up) effective with new rates in August 2009

#### Regulatory

- Approval of the rate request in Kansas and Missouri with new rates in effect late summer 2009
- New rates in "Iatan 2 case" in effect summer 2010 in KS, and fall 2010 for the MO properties

# **Key Assumptions Continued**

#### • Plant Performance

- Equivalent Availability Factor (EAF) and Capacity Factor (CF) for fossil fleet for 2009 of ~80% and 77%, respectively; in 2010-11, EAF in 80%-85% range and CF relatively constant
- Wolf Creek plant performance at historical levels

#### • Capital Expenditures

- Previous cost and schedule disclosures for Iatan 2
- No wind in capex projections until 2011
- Reduced spending on LaCygne environmental in 2009 10
- · No additional environmental mandates

#### Fuel Expense

- 67% covered by FAC
- Approximately 85% of 2009, 45% of 2010, and 15% of 2011's KCP&L coal requirements are under contract

## **Key Assumptions Continued**

#### • Finance

- · Dividend maintained at \$1.66/share for 2009-11
- \$200 million of equity issuance in 2009; total \$400 million of additional equity issuance in 2010-11
- $\cdot$  \$850 \$950 million of new debt over 2009-11; short-term / long-term TBD
- No refinancing of GMO debt prior to maturity
- Amortization of GMO debt write-up reduces pre-tax interest expense by approximately \$32 million per year in 2009-11

#### • Tax

- The marginal tax rate before credits relatively constant at 38.9%
- Tax credits of \$6-8 million per year will reduce the marginal tax rate from 38.9% (excludes advanced coal credits)
- NOLs No earnings benefit, but \$100 million of NOLs available annually in 2009 - 2012 to reduce cash taxes

Core earnings is a non-GAAP financial measure that differs from GAAP earnings because it excludes the effects of discontinued operations, certain unusual items and mark-to-market gains and losses on certain contracts. Great Plains Energy believes core earnings provides to investors a meaningful indicator of its results that is comparable among periods because the effects of items that may not be indicative of Great Plains Energy's prospective earnings potential. Core earnings is used internally to measure performance against budget and in report and the Board of Directors and are a component, subject to adjustment, of employee and executive compensation plans. Investors should note that this non-involves judgments by management, including whether an item is classified as an unusual item, and Great Plains Energy's definition of core earnings may differ from similar terms of the companies. The impact of these items could be material to operating results presented in accordance with GAAP. Great Plains Energy is unable to reconcile core earnings and mark-to-market gains or losses on energy contracts.
